

# HARSHITHA U V

Associate Software Engineer

Bengaluru, KA | +91 7022508648 | harshithau.v3@gmail.com

[LinkedIn](#) | [Portfolio](#)

## SUMMARY

Versatile Software Engineer with a solid foundation in Data Science, specializing in developing scalable and efficient web and Android applications using Angular, Kotlin, Python, and FastAPI. Experienced in data-driven development, REST API design, and backend integration. Passionate about turning analytical insights into intelligent software solutions that enhance performance, usability, and business impact.

## PROFESSIONAL EXPERIENCE

### Associate Software Engineer

Autoverse Mobility Pvt Ltd

May 2024 – Present

Bengaluru, KA

- Developed scalable web and Android applications for a B2B automotive spare-parts platform using Angular, Java, Kotlin, Python, and FastAPI.
- Built Android features in Kotlin (MVVM, Room, Retrofit) with seamless REST API integration; designed and consumed RESTful APIs for web and mobile communication.
- Delivered features such as vehicle-based parts search, quotation/request workflows, cart, and order processing, while optimizing backend services and database queries for better performance.
- Collaborated with backend, web, QA, and business teams following clean code and testing best practices to resolve production issues and ship on schedule.

### Data Science Intern

Raising Exceler (AI Variant)

Jul 2023 – Jan 2024

Bengaluru, KA

- Collected, cleaned, and analyzed large datasets to derive actionable insights; built predictive models using Python (Pandas, NumPy, Scikit-learn).
- Created visualizations and dashboards using Power BI and Matplotlib to support data-driven decision-making.
- Assisted in AI/ML model development and validation for business use cases, collaborating with cross-functional teams to implement solutions effectively.

## SKILLS

**Languages & Frameworks:** Python, Java, Kotlin, JavaScript, TypeScript, Angular, FastAPI

**Mobile & Backend:** Android SDK, MVVM, Room, Retrofit, RESTful APIs, Frontend & Backend Development

**Data & ML:** Machine Learning & AI, Deep Learning, Pandas, NumPy, Scikit-learn, Statistical Analysis, Power BI, Data Visualization

**Databases & Tools:** SQL, MySQL, PostgreSQL, Git, Postman, Excel, R, Agile, Testing, Debugging, Code Review

**Professional:** Communication, Problem-Solving, Business Understanding, Team Collaboration, Time Management

## PROJECTS

### B2B Automotive Spare Parts E-Commerce Platform

Currently Working

Building and maintaining a B2B automotive spare-parts platform across Android and web — vehicle-based parts search, OEM/OES parts selection, quotation/request workflows, cart, order processing, and partner/garage modules — while collaborating with backend, web, QA, and business teams to improve performance and UX.

**Technologies:** Kotlin, Java, Android SDK, MVVM, Retrofit, Angular, TypeScript, Python, FastAPI, REST APIs

### Bankruptcy Prevention — Logistic Regression

- Built a logistic regression model achieving 98% accuracy to predict potential business bankruptcy; conducted feature selection, statistical analysis, and visualization using Matplotlib and Seaborn with a 4-member team.

### Oil Price Prediction — Time Series Forecasting

- Developed a forecasting model using time series analysis achieving high prediction accuracy; visualized key trends with Matplotlib and Seaborn.

## CERTIFICATIONS

- Data Science Certification — ExcelR Raising Excellence, Bengaluru
- Machine Learning with Python — IBM
- Data Analyst Internship Certificate

## EDUCATION

### Bachelor of Engineering (B.E.) in Computer Science and Engineering

Visvesvaraya Technological University, Belagavi

2019 – 2023

Hassan, KA
