

HARSHITHA U V

Associate Software Engineer

Bengaluru, KA | +91 7022508648 | harshithau.v3@gmail.com

[LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer with a Computer Science background and hands-on Data Science foundation, combining production software delivery with applied machine learning. Experienced in the full ML workflow — data cleaning, feature engineering, model training, and evaluation — using Python, Pandas, NumPy, and Scikit-learn, alongside strong SQL and REST API skills. Comfortable working with crossfunctional engineering, data, and business teams, and eager to deepen expertise in deep learning frameworks such as TensorFlow and PyTorch.

PROFESSIONAL EXPERIENCE

Associate Software Engineer

May 2024 – Present

Autoverse Mobility Pvt Ltd

Bengaluru, KA

- Built and shipped features for a data-driven B2B automotive spare-parts platform, applying structured problem-solving and statistical thinking to optimize backend queries and workflow performance.
- Designed and consumed RESTful APIs across Android (Kotlin, MVVM, Room, Retrofit) and web (Angular, FastAPI) layers, translating business and data requirements into production-ready code.
- Delivered vehicle-based parts search, quotation/request workflows, cart, and order processing, iterating on solutions based on feedback from cross-functional QA and business stakeholders.
- Collaborated with backend, web, QA, and business teams following clean code and testing best practices, identifying issues early and proposing solutions in daily stand-ups.

Data Science Intern

Jul 2023 – Jan 2024

Raising Exceler (AI Variant)

Bengaluru, KA

- Collected, cleaned, and pre-processed large real-world datasets — handling data quality issues, normalization, and feature extraction — to prepare data for machine learning tasks.
- Built and evaluated predictive models (Python, Pandas, NumPy, Scikit-learn), applying cross-validation and metrics such as accuracy and precision to select the best-performing approach.
- Created visualizations and dashboards in Power BI and Matplotlib to communicate data-driven insights to non-technical stakeholders.
- Assisted in AI/ML model development and validation for business use cases, working with cross-functional teams and presenting findings with guidance from senior team members.

SKILLS

Languages & Frameworks: Python, Java, Kotlin, JavaScript, TypeScript, Angular, FastAPI

Mobile & Backend: Android SDK, MVVM, Room, Retrofit, RESTful APIs, Frontend & Backend Development

Data & ML: Machine Learning & AI, Deep Learning, Model Evaluation & Cross-Validation, Hyperparameter Tuning, Feature Engineering, Time Series Forecasting, Statistical Analysis, Power BI, Data Visualization

Databases & Tools: SQL, MySQL, PostgreSQL, Git, Postman, Excel, R, Agile, Testing, Debugging, Code Review

PROJECTS

Oil Price Prediction — Time Series Forecasting: Built a forecasting model using time series analysis techniques to predict oil price trends, achieving high prediction accuracy and visualizing key patterns with Matplotlib and Seaborn.

Bankruptcy Prevention — Logistic Regression: Applied logistic regression to predict business bankruptcy risk, achieving 98% accuracy through feature selection, hyperparameter tuning, and statistical analysis; visualized results with Matplotlib and Seaborn.

B2B Automotive Spare Parts E-Commerce Platform

Currently Working

Designed and maintain a B2B automotive spare-parts platform spanning Android and web, including data-driven modules for parts search, quotation workflows, and order processing.

CERTIFICATIONS

- Data Science Certification — ExcelR Raising Excellence, Bengaluru
- Machine Learning with Python — IBM
- Data Analyst Internship Certificate

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2019 – 2023

Visvesvaraya Technological University, Belagavi

Hassan, KA
